## Introducing HCAP.

**Health Care Aide  
Certificate Program.**

## About the Health Care Aide Certificate Program.

Are you looking for stable, rewarding work that really allows you to make a difference in people's lives? If so, pursuing a Health Care Aide Certificate could be the answer. Health Care Aides (HCAs) provide valuable support to professional nurses and other medical professionals as they assist clients with the activities of daily living in-home care, long-term, and assisted living facilities. This satisfying and important work is perfect for caring, kind, and giving individuals looking for a truly meaningful career.

Qualified HCAs can work in a variety of roles, including:

- Long-Term Care Aide
- Home Health Care Worker
- Residential Care Attendant
- Health Care Assistant
- Nursing Aide
- And more!

## What you will learn in the Health care Aide Certificate Program

OSNM Academy's Health Care Aide Certificate Program will equip you with the fundamental medical knowledge and interpersonal communication skills you need to succeed in a Health Care Aide role

### Program Structure:

HCAP is a 12-week blended learning program consisting of 60 hours of didactic training spread of over 6 weeks and 6 weeks of practicum in an approved clinical setting.

Participants will acquire the knowledge and practical experience to work effectively as a Healthcare Aide.

Topics covered in the program include:

- Communication in the Health Care Environment
- Providing Client Care and Comfort
- Caring for the Elderly Patient
- Meeting Complex Care Needs
- Effective Documentation Practices
- And more!
