Addon Installation

Please follow the below steps to complete the installation process of **Scorm Course Addon**.

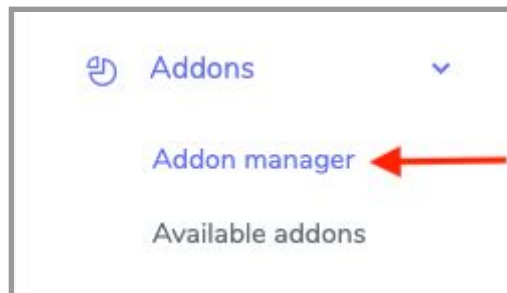

1. Before starting the installation process, we would suggest you to check your application version. For checking the application you can move to **About** section from **Settings** menu.
2. If you are running the latest version 4.4 or greater than 4.4 of Academy LMS, You are now ready to install the addon.

3. If you are running the latest version, You are now good to go.
4. First download the addon you want to install on your application from Codecanyon.
5. Unzip the downloaded file.
6. You should get Two folders inside. One is for documentation

and the other is for the addon file.

7. You do not need to change anything. Like renaming, removing or something else.
8. Now get back to your application. Login as Admin role. After logging in you will be able to keep following.
9. From the left navigation menu, Go to **Addon Manager** from **Addon** section.

10. You will find a list of addons you have so far.
11. Click on the “**Add New Addon**” button on the top. You should redirect to an upload addon view
12. That view will contain a single field called “**Upload Addons File**”. Just upload the “**scorm_course.zip**” file.
13. After that hit the “**Install Addon**” button.
14. You should get a success message notification and you can also see your installed addon on the “**Installed Addon**” list below.

Addon Usage

If you've installed the addon successfully, You are welcome to this section. Scorm, which stands for Shareable Content Object Reference Model, is a set of technical standards for eLearning software products. Scorm tells programmers how to write their code so that it can 'play well' with other eLearning software. It is the de-facto industry standard for eLearning interoperability.

Add scorm course:

- You will get a select option to select the type of course when adding courses. To add a Scorm course, select Scorm and add the course with the required information.
